

Introducing the new 'THORAX' preamp/compressor/EQ by ~Sebatron~

“An outstanding Crisp Stellar Tone of the Highest Calibre....”

The new Sebatron THORAX will improve your sound and lifestyle! Quality components and build make this Valve Microphone preamp and Compressor a must for any Home or Professional recording setup.

The new THORAX features are:

- 'AXIS' valve mic preamp frontend with variable colour and low cut
- Fully balanced and unbalanced phono and XLR inputs and outputs
- Variable compressor input trim control so signals can be driven
- Fully variable and switchable two band processing Equalizer
- Fast, detailed and re-active Optical compression
- Fully variable Threshold, Ratio, Attack, Release functions
- Tight/Smooth switch similar to Peak/RMS
- Switchable Side-chain insert for external EQ or 'Ducking'
- Variable High Pass Filter for compressor side-chain control.
- Transparent Output level control
- Switchable level/gain reduction metering
- Quality switches, potentiometers and components used throughout

- Power:** Externally switchable 110/120/220/240 VAC for global useage.
- Build:** Chassis is 1.2mm mild steel powder coated 'Textured Black'. Front Panel is 3mm mild steel powder coated 'Transformer Grey'. Single sided printed circuit boards.
- Topology:** All discrete and Class A Valve and Solid State signal path running on +300V and +60V rails respectively.
- Circuitry:** Two Dual Triode 12AT7/ecc81 and High Voltage Silicon Transistors.
